The History of ZenTao

How is ZenTao designed?

About ZenTao Founder

Chunsheng Wang

- open source enthusiast and volunteer

- Agilist and Agile practioner

- experienced project manager in Alibaba

- an entrepreneur

As the Product Owner, do you feel like...

Work Experience in Alibaba

- 2006-2009, applied Scrum in a lot of projects and the tools used were

- ✓ MS SharePoint for story and workflow management
- ✓ Bugfree for bug tracking
- ✓ XPlanner for proejct and task management

Problems found

- Information was manually input and managed in different tools.

- Workflow was implemented automanouly, so too many checkpoints.

- Just looks like doing Scrum, but no continuous improvement.

Possible Solution

- an integrated management tool that will improve work efficiency, workflow implementation, and visual management.

Research and Preparation

- 2007-2009, research on project management and tools.

- 2009, ZenTao features, framework and business mode were designed.

- March 2009, ZenTao framework 1.0 alpha were released.

- July 2009, ZenTao 0.01 alpha was released .

Scrum+ZenTao

Our team use Scrum(method) and ZenTao(tool) to manage all development projects of ZenTao.

- 2-week Sprints

- Document stories, issues and suggestions and entered them in ZenTao to track and manage

- ZenTao 0.3+, our team use ZenTao to manage all our projects.

Practice

- Pair programming

- Coding standards

- Source code management

- Code review

- Daily commit

- Cross test

- Code refactoring

- Sharing meeting

- Simple design

- Automation test

- Framework

Our Favorite LAMP

open source, cross-platform, lightweight, efficient, massive users

Make a wheel that you can control

- It took six month to develop ZenTao framework (public domain).

- The third-party frameworks are not reliable. The problems are messy code, performance, extension, support, etc...

- ZenTao framework plays an important role in efficiency and quality of team development.

- ZenTao framework is also the cornerstone of our business mode: freemium.

Our Team

- People who share the same values with our team.

- Fate.

- Give newcomers time to grow up.

- Trust newcomers and provide them with resources.

- It is OK to make mistakes.

- One-on-one mentoring.

- No overtime and 7.5 hours x 5 days

- Personal growing, stable income, and long-term returns.

Thoughts on Agile

- Agile non-standardized management

- Agile depends on the subjective initiative of the team.

- No declarative doctrines.

- Processes and tools are secondary, and business success is the king.

- Don't overthink. Choose what is right for you!

Thank you!
